

RCM470LY Series

Ground Fault Monitor / Ground Fault Relay

Grounded and High-Resistance Grounded AC Systems

Ground fault monitor RCM470LY

Ground Fault Monitor / Relay
for Grounded AC Systems

RCM470LY

Device features

- External measuring current transformer
- Wide response value ranges:
10 mA ... 10 A, 6 mA ... 600 mA
(40 ... 400 Hz)
- Response delay, adjustable 0...10 s
- Alarm relay with voltage-free DPDT contact
- Selectable between normally energized and normally de energized operation
- Latching or non-latching operation
- TEST / RESET button, internal / external
- LED bar graph indicator $I_{\Delta n}$ 0...100 %
- Optional external meter terminal
- CT connection monitoring
- Sealable transparent cover
- Separate auxiliary supply voltage
- Type A according to IEC 60755

Approvals

Description

The RCM470LY monitors for ground faults in grounded and high-resistance grounded AC systems, both single- and three-phase. The RCM470LY is specially designed to provide advanced warning of developing ground faults without the problems associated with high sensitivity nuisance tripping.

A wide, steplessly adjustable setpoint range allows for flexibility in a variety of systems. A DPDT contact allows for both information transmission (such as to a PLC) and power interruption (such as through a contactor or shunt trip breaker).

Since the values are measured using a special current transformer, the RCM470LY is nearly independent of the load current and the system voltage. The device can also be used for busbar systems.

Applications

- Ground fault detection in single- or three-phase AC systems
- Motors and motor control systems
- Generators, portable and fixed
- Alarm systems, safety devices
- Current monitoring of normally offline single conductors
- Cooling equipment with valuable frozen goods
- Industrial controls
- Heat tracing systems

Function

Measurements of the system's ground fault current are taken via an external current transformer. All phases (including the neutral if one exists) are placed through the current transformer. The currently measured value (measured as a percentage of the setpoint) is indicated on the LED bar graph.

If the measured value exceeds the response value, the contacts switch over and the alarm LEDs activate after the time delay has expired. If the device is set to non-latching mode and the ground fault clears, the alarms will then clear. If the device is set to latching mode, the alarms will not clear until the device is reset manually or the supply voltage is lost.

The TEST function allows for an internal operation testing of the device. Settings are modified via the device's DIP switches and potentiometers.

The connections between the device and the external current transformer are continuously monitored. If the device detects a connection error, the CT connection monitoring alarm will activate, and the contacts will change over without delay.

Wiring Diagram

- 1 - External supply voltage used to power device, a 6 A fuse recommended for line protection.
- 2 - Connection to external current transformer. All phases, including the neutral if one exists, are placed through the CT.
- 3 - Optional external measuring instrument
- 4 - External TEST and RESET button terminal
- 5 - DPDT alarm contact

Note: Do not route the ground conductor through the current transformer when the line conductors are also routed through.

Front Display

- 1 - Combined TEST and RESET button: short depress (< 1s) = RESET; long depress (> 2s) = TEST
- 2 - Power On LED
- 3 - Alarm LED: Illuminates when the response value has been exceeded. Flashes when the CT connection alarm is active.
- 4 - LED bar graph indicator: shows the measuring value in percent of the preset response value.
- 5 - Potentiometer for setting the response delay (0...1 s).
- 6 - Potentiometer for setting the response value (x 1...10 mA)
- DIP switch settings (white = switch position)
 - 7 - Alarm relay operation settings
 - A - Normally de energized
 - B - Normally energized
 - 8 - Fault memory / latching behavior settings
 - A - Fault memory ON (latching mode)
 - B - Fault memory OFF (non-latching mode)
 - 9 - Sample response value settings

Technical data: Ground fault monitor RCM470LY

Insulation coordination acc. to IEC 60664-1

Rated insulation voltage	AC 250 V
Rated impulse voltage / pollution degree	4 kV / 3

Voltage ranges

Supply voltage U_S	see ordering details
Operating range of U_S	0.85...1.1 x U_S
Frequency range of U_S	DC / 50...400 Hz
Power consumption	≤ 3 VA

Measuring circuit

External measuring current transformers	W..., WR..., WS... series
Load	180 Ω
Load RCM470LY-72	18 Ω
Operating characteristic acc. to IEC 60755	Type A
Rated residual operating current $I_{\Delta n}$	10 mA...10 A / 100 A
Response delay t_v , adjustable	0...10 s
Accuracy of response delay	+ / - 20 %
Rated frequency	40...400 Hz
Relative percentage error	40...400 Hz: 0...- 25 % 400...1000 Hz: 10...- 25 %
Hysteresis	approx. 25 % of the response value
Response time t_{an} at $I_{\Delta n} = 1 \times I_{\Delta n}$ ($t_v = 0$ s)	≤ 250 ms
Response time t_{an} at $I_{\Delta n} = 5 \times I_{\Delta n}$ ($t_v = 0$ s)	≤ 20 ms
Number of measuring channels	1

Displays

LED bar graph indicator	0...100 %
LEDs	Power On, Alarm

Inputs/outputs

TEST and RESET button	internal / external
Cable length, external TEST and RESET button	≤ 30 ft
Current source for external measuring instrument	DC 0...400 μA
Load	12.5 kΩ

Cable lengths for measuring current transformers

Single wire ≥ AWG 20 (0.75 mm)	0...3.2 ft (0...1 m)
Single wire, twisted ≥ AWG 20 (0.75 mm)	0...32.8 ft (0...10 m)
Shielded cable ≥ AWG 22 (0.5 mm)	0...131 ft (0...40 m)

Recommended cable (shielded, shield on one side connected to terminal I of the RCM470, not connected to ground) J-Y(ST)Y min. 2 x 0.8

Switching elements

Number of switching elements	1 DPDT contact
Operating principle, adjustable	normally energized or de energized
Electrical endurance, number of cycles	12000
Rated contact voltage	AC 250 V / DC 300 V
Limited making capacity	AC / DC 5 A
Breaking capacity	2 A, AC 230 V, PF = 0,4 0.2 A, DC 220 V, L / R = 0.04 s
Fault memory behavior	ON / OFF (Latching / Non-latching)

General data

EMC immunity	acc. to EN 61543
EMC emission	acc. to EN 61000-6-4
Shock resistance IEC 60068-2-27 (during operation)	15 g / 11 ms
Bumping IEC 60068-2-29 (during transport)	40 g / 6 ms
Vibration resistance IEC 60068-2-6 (during operation)	1 g / 10...150 Hz
Vibration resistance IEC 60068-2-6 (during transport)	2 g / 10...150 Hz
Ambient temperature, during operation	-10 °C...+55 °C
Ambient temperature, when stored	-40 °C...+70 °C
Climatic category IEC 60721-3-3	3K5
Operating mode	continuous operation
Mounting	any position
Connection	screw terminals
Connection properties	
rigid / flexible	AWG 24...12 / 24...14
flexible with ferrules without / with plastic collar	AWG 24...14
Conductor sizes (AWG)	24...12
Protection class, internal components (IEC 60529)	IP30, NEMA 1
Protection class, terminals (IEC 60529)	IP20, NEMA 1
Type of enclosure	X470
Enclosure material	polycarbonate
Screw mounting	2 x M4
DIN rail mounting acc. to	IEC 60715
Flammability class	UL94V-0
Standards	IEC 62020
Instruction leaflet	BP401003
Weight	≤ 350 g
